

634022 TimeSmart Clock Radio

Super: The Clock That Never Needs Setting

Hi, this is Michael from Brookstone. Today I want to show a clock radio that never needs to be set or reset—even after power outages or Daylight savings time.

Super: Brookstone® TimeSmart® Clock Radio.

It's the Brookstone TimeSmart Clock Radio.

Super: Plug it in

Just plug it in... and watch it automatically set itself to the correct time for your time zone.

Super: Sets itself automatically.

If you have to move the clock or it gets unplugged accidentally, or if there's a power outage, no problem. TimeSmart will always set itself to the correct time—every time. It even remembers your alarm settings.

Super: Built-in TimeSmart® Technology

Built-in TimeSmart® Technology stores the correct time and can be set for six time zones across the U.S.

Super: Auto-adjusts to Daylight Savings

TimeSmart even auto-adjusts to Daylight Savings.

Super: Pop-up alarm buttons

Another thing I like about the TimeSmart Clock is that has these pop-up alarm buttons that make easy for me to see whether or not I've set the alarm—and easy to find and turn off in the morning.

Supers: Alarm Clock, Clock/Radio, Radio/CD

Brookstone TimeSmart self-setting clocks are available as a standard alarm clock and a clock radio.

My TimeSmart clock is the easiest alarm clock I've ever owned.
