

606368 Wine Opener

0:02

Hi, this is Mike at Brookstone. Today I'm going to show you the easiest way ever to open wine.

With our one-touch Automatic Wine Opener, you'll no longer have to struggle with old-fashioned corkscrews that can break the cork and strain your wrist.

Simply place the wine opener on the bottle.

Press and hold the switch... and watch as it uncorks your bottle of wine. It even ejects the cork for you afterward.

The Automatic Wine Opener works with natural or synthetic cork.

0:30

It also comes with its own recharging base, a foil cutter and an AC adapter.

And because our wine opener is rechargeable, you'll never need to buy batteries.

In fact, it uncorks 30 bottles of wine on a single charge.

Cheers!
